

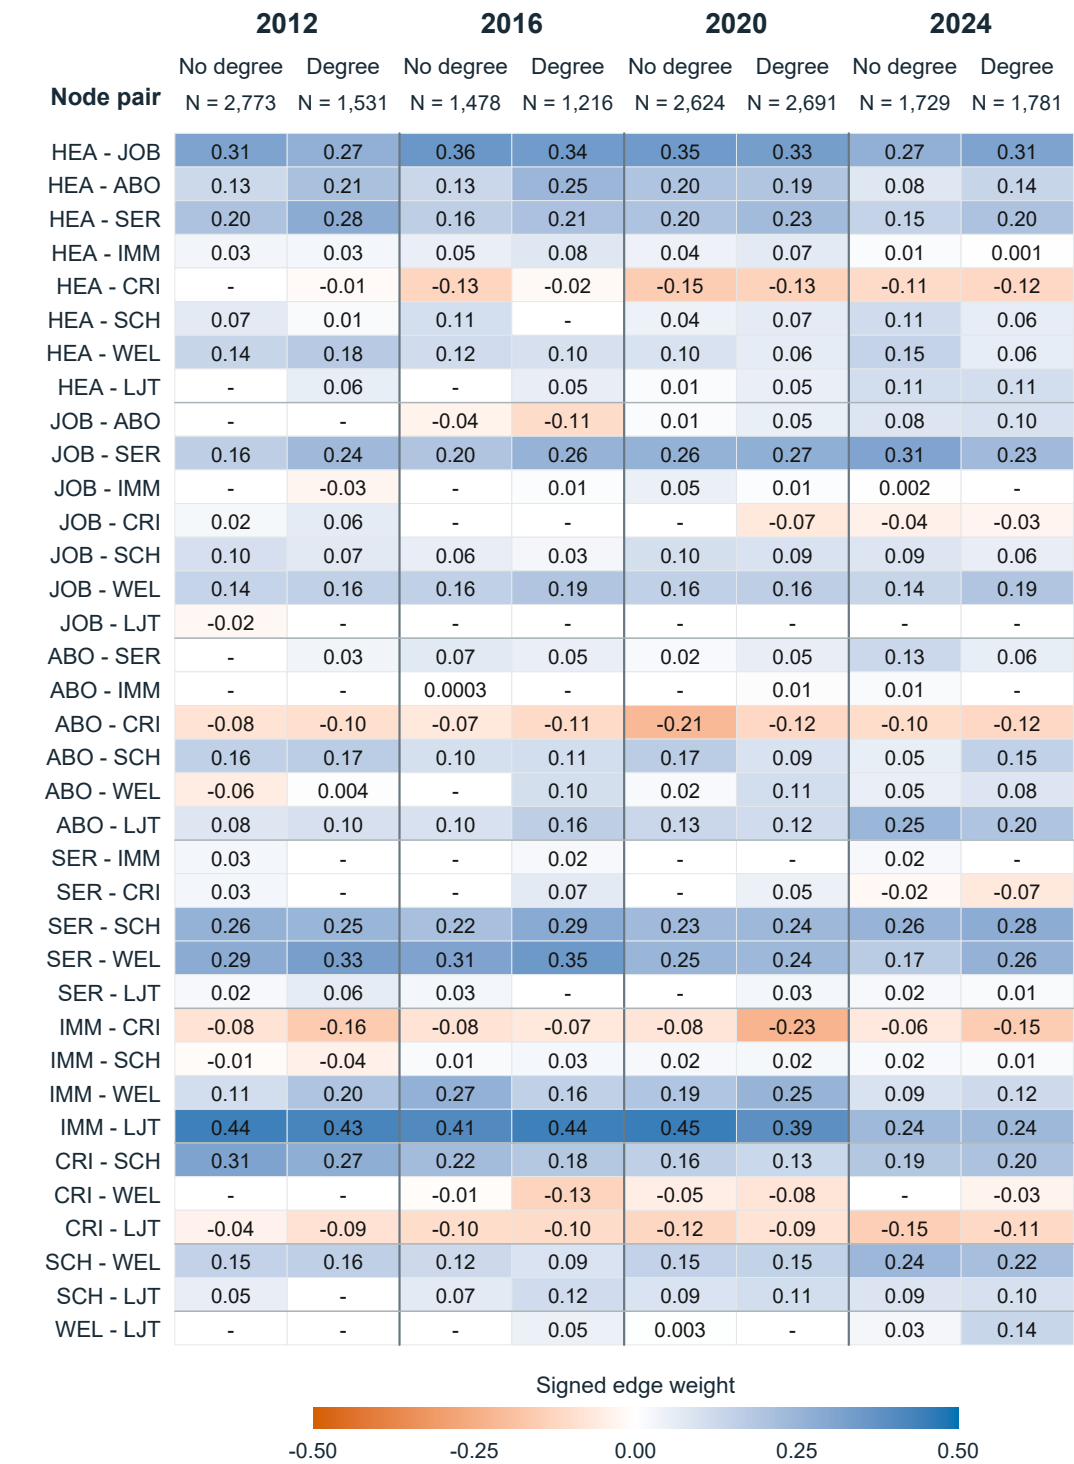

Figure 4.3 Edge weights by education group

All 36 node pairs; saved regularised conditional-association estimates

- = exact zero (not retained). Small nonzero weights are kept; no cells are missing.

HEA: government health insurance; JOB: government jobs / living-standards responsibility;
ABO: abortion policy; SER: government services / spending; IMM: immigration level;
CRI: crime spending; SCH: public-school spending; WEL: welfare spending;
LJT: lower perceived likelihood that immigration takes jobs.

No degree: VCF0110 = 1-3. Degree: college / advanced degree (VCF0110 = 4).

Common colour limits: -0.50 to +0.50. Cell labels are rounded; exact values accompany the figure.
